Agent:	131 UFG Enterprise Analytics IA		
Underwriter:	James, LeBron		

WC Tier and Technique Premiums: Score with full (3-yr) claim history

Interpretation: Prospective term predicted loss ratios of policies in tier 5 are typically 19% lower than average.

	Manual Prem	On-level Manual Prem	Modified Prem
Current	$10,907	$10,899	$15,686
Technique	-	$13,624	$11,868

WC model predicted frequency and severity during the policy term:

Predicted indemnity claim count is **0.16**; Predicted average payment for each indemnity claim is **$55,313**.

Predicted medical-only claim count is **0.43**; Predicted average payment for each medical-only claim is **$1,431**.

Top 5 Model Predictors Attributed to High Projected Tier For This Policy

1. The count of all claims in the past three years (normalized by the policy total manual premium) is high.
2. The hazard index on workers compensation is high in the policy SIC and NAICS industry (according to AM Best).
3. The policy governing class code hazard grade is E.
4. All or most of the manual premium are from a single state in the policy.
5. Crime: The average count of auto theft in the past three years is high in the county.
